EDUCATION

Okan University

Associate Degree in Computer Programming

2020 - 2022

Küçükyali Vocational and Technical Anatolian High School

Information Technologies

2016 - 2020

TECHNOLOGIES SKILLS

- Programming Languages:** Kotlin, Dart, Java, JavaScript, HTML, CSS
- Development Tools:** Android Studio, VS Code, Git, GitHub, GitLab, Postman, FireBase
- Other Skills:** Photoshop, Clean Architecture, Datalogic Devices

LANGUAGE

- Turkish: Native
- English: Basic (In Progress)

OTHER DETAILS

- Driver's License: Class B
- Military Service: Completed

PROFILE

I am an enthusiastic Mobile Developer with hands-on experience in designing, developing, and maintaining dynamic mobile applications. I have successfully led projects like the "Bukalemun" warehouse management system, and I excel in clean architecture, MVVM design, and utilizing modern development tools such as Kotlin, Retrofit, and Datalogic devices. With a strong background in both Android development and web technologies, I am passionate about crafting scalable and efficient solutions that address real-world business needs.

WORK EXPERIENCE

Neutec Technology

April 2023 - July 2024

Android Developer - Kotlin

- Bukalemun Project:** Led the development of an innovative, dynamic warehouse management system tailored to Neutec Technology's evolving needs. The "Bukalemun" project featured a highly adaptive interface that could seamlessly integrate with various warehouse processes, improving efficiency and scalability.
- Developed features for real-time tracking and management of warehouse inventory.
- Integrated Datalogic handheld devices for inventory scanning and updates.
- Designed the system to support scalability, allowing for future expansion and modifications as the company's needs evolved.
- Employed MVVM architecture, Retrofit for API requests, Hilt for dependency injection, Coroutine for asynchronous programming, and Navigation for managing app destinations.
- Focused on clean architecture principles to ensure a maintainable and modular codebase.

Used Technologies: Android Studio, Kotlin, Retrofit, MVVM, Dagger-Hilt, Navigation, DataLogic, Coroutine, OkHttp Interceptor, Rfid, Lottie

Orka Computer

2018

Web Developer (Internship) – Html, Css, JavaScript

- Completed a high school internship where I contributed to the design and development of web pages for Orka Computer.
- Created user-friendly interfaces and optimized the website for better performance.
- Gained significant hands-on experience in web development technologies, which laid the foundation for my subsequent career in Android development.
